OVERVIEW

The objective of this workshop is to explore the management of risk and risk management in the construction industry from inception to completion and final commissioning. Identifying pitfalls and creating an awareness of the critical path of delivering your project on time, at the right cost, every time. In addition, how complying with the H & S Act can influence a positive outcome.

BENEFITS OF ATTENDING

1. Gaining an insight into the objectives of the construction industry accord (prepared by DoL) involving business, government, the trade unions and the road to sustainable growth.
2. Creating a new perspective as we interpret the relationship between an employer and employee as contemplated in the OHS Act. As the client/developer, consulting engineer are you the employer ????
3. A quick introduction to risk management principles and guidelines.
4. Understanding the impact cost of incident/accident insurance in the construction industry.
5. Acquiring a comprehensive understanding of legal risk and your liability.
6. Principal consultant, principal agent, construction manager, project construction manager.... what is their role and responsibilities?
7. Learning more about an innovative system solution.

WHO SHOULD ATTEND

Engineering Professionals
Design Engineers
Civil Engineers
Electrical Engineers
Client Developers
Project Managers
Quantity Surveyor's
